CV

Software Engineering Technology Student

mchlhutajulu@gmail.com | +62 895-3607-05332 | North Sumatra, Indonesia | github.com/michaelhutajulu

EDUCATION

Institut Teknologi Del

D-IV Software Engineering Technology

Student ID: 41424012

Current GPA: 3.21 / 4.00

Expected graduation: 2028

TECHNICAL SKILLS

Mobile:	Flutter, Dart, mobile UI flow
Backend:	Golang, REST API, JWT
Web:	Laravel, PHP, React, HTML/CSS/JS
Database:	PostgreSQL, MySQL, GORM
Tools:	Git, Postman, Figma, Firebase FCM
Process:	Testing, documentation, presentation

LANGUAGES

Indonesian - Native

English - Intermediate

INTERESTS

iOS Development
Product Thinking
Community Service Technology
Design Thinking

OBJECTIVE

To join Apple Developer Academy Indonesia and grow through a 9-month learning journey that strengthens my skills in iOS development, product thinking, design, collaboration, and real user validation.

PROFILE

Software Engineering Technology student with practical experience building mobile applications, web systems, backend APIs, and database-backed service flows. I enjoy turning requirements into usable products and explaining technical work clearly.

SELECTED PROJECTS

TingMo - Mobile-Based Village Administration System

Group Project | Project Manager & Developer | 2026

- Built a digital village-service system for Desa Tinggir Ni Pasir with mobile app, backend API, and web admin workflows.
- Worked around authentication, letter submission, complaints, facility borrowing, announcements, notifications, and status tracking.
- Tech: Flutter, Golang/Gin, PostgreSQL, Laravel, REST API, Firebase Cloud Messaging.

UMKM Bintang Serasi Information System

Team Project | Project Lead

- Led a web-based information system project for a local UMKM, focusing on requirements, feature flow, and implementation planning.
- Practiced Laravel, MySQL, web administration flow, and user-oriented content structure.

Belajar SMA Website

Team Project | Contributor

- Contributed to a learning website for high-school students, especially the Grade 12 Chemistry page.
- Practiced React, MySQL, page structure, and presenting educational content in a clearer digital format.

GalonKu

Personal Project | Product & App Flow Practice

- Explored a service-based application concept and practiced product logic, user flow, and feature planning.
- Used the project to strengthen my understanding of service request flow and mobile-backed systems.

Experience, Activities, and Achievements

CV continuation for Apple Developer Academy Indonesia Application

TEACHING & LEADERSHIP EXPERIENCE

Informatics Extracurricular Teacher

Teacher / Mentor | 30+ students

- Taught basic informatics concepts and practiced simplifying technical explanations for beginner students.
- Learned to prepare learning flow, adjust communication style, and support students with patience.

BEM IT Del - Department of IPTEK / Digital Development

Organization Experience | Contributor

- Contributed to digital-development activities and supported team-based work in an organization setting.
- Improved communication, reliability, progress discussion, and responsibility beyond classroom assignments.

PKM Socialization Coordinator

Leadership / Communication Experience

- Helped coordinate socialization activities and supported communication between team members.
- Practiced organizing information, follow-up, teamwork, and speaking with different audiences.

OTHER TECHNICAL WORKS

- Class schedule and weather API website using HTML, CSS, and JavaScript.
- Class website using HTML, CSS, and JavaScript.
- BEM IT Del website contribution and digital-content support.

ORGANIZATIONS

- UKM Del Programming - programming community and technical learning environment.
- HIMATERA organization involvement.
- BEM IT Del - Department of IPTEK / Digital Development.

ACHIEVEMENTS & COMPETITION EXPOSURE

- OSN-K Informatika experience during high school.
- BMC competition semifinal/final stage experience.
- Hackathon participation experience.
- PKM and Gemastik preparation / innovation exposure.
- Reached interview stage for EGYIC Singapore/Malaysia.

WHY THIS FITS APPLE DEVELOPER ACADEMY

My experiences show a consistent pattern: I like learning by building. I have worked with mobile apps, web systems, backend services, teaching, documentation, and team coordination. Apple Developer Academy is the right next step because I want to build better products, not only more features. I want to learn how to validate problems, design cleaner experiences, develop with Swift and iOS technologies, and collaborate with people from different backgrounds.

PERSONAL STRENGTHS

- Builder mindset and willingness to keep improving.
- Experience explaining technical ideas to non-technical people.
- Comfortable working in teams, preparing deliverables, and presenting progress.
- Strong interest in community-focused digital products.
